13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*  
We plan on completing the Lewis Shale & Cliff House and commingling it with the existing Mesaverde production. 7" 20# K-55 casing @ 4,538' with 4 1/2" 10.5 # K-55 from surface to 5,300'. PBTD is 5,291'. After the rig pulls tubing, a plug will be set, the hole loaded with 2% KCL and a CBL run to determine cement integrity prior to fracturing. The Lewis Shale & Cliff House completion will be a 2 stage N2 foam frac, as follows:  
Lower Lewis Shale & Cliff House: 4,165' to 4,600'; perforate 46 x .38" holes; use 100,000# 20/40 Brady Sand.  
Upper Lewis Shale: 3,650' to 4,100'; perforate 47 x .38" holes; use 100,000# 20/40 Brady Sand.  
To complete this formation we will need to construct an earthen blow pit (30' x 50' x 10' deep). All work will be within existing disturbed location. We will close pit when all water has been removed and re-seed to BLM specs.  
We plan on completing this formation upon BLM approval. Rig is currently available.

I hereby certify that the foregoing is true and correct
