The elevation of the derrick floor above sea level is 5552 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill a well with rotary tools at the above location to an approximate total depth of 1450'. 100' of 8-5/8" O.D. casing will be set and cemented to surface. Completion is contemplated in the Gallup formation. Should the well prove productive a 4-1/2" O.D. oil string will be used.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
