Astec, New Mexico **July 6**, 19 **61**

Well No. **18-11** is located **1670** ft. from **[S]** line and **1980** ft. from **[W]** line of sec. **13**
Section 13 **31 North 14 West** **N.M.P.M.**
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Verde-Gallup **San Juan** **New Mexico**
(Field) (County or Subdivision) (State or Territory)

The elevation of the **Ground** ~~surface~~ above sea level is **5797** ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is proposed to pull casing and plug the subject well. A 30-inch plug will be set covering the open hole and approximately 30' of casing. A 30-inch plug will be set covering the stub on the cut-off portion of the pipe. A 15-inch plug will be set covering the end of the surface casing. A 9-inch plug will be set on surface for a monument. In the event we are unable to pull any casing the casing will be filled with mud from the bottom plug to the surface plug. Cement will be pumped down the annulus between the surface pipe and production pipe to prevent surface water encroachment.

The production on this well is now 0.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
