## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is proposed to drill with rotary tools to a depth of 100. feet, set 9-5/8" casing and cement to surface 7/100 sec. Thereafter to drill with rotary to the top of the producing zone, run electric log and run 5-1/8" casing and cement w/30 sec. Thereafter to drill in with cable tools, run GHI log, free through casing w/20,000 gallons of crude and 20,000 sand; wash and test well with cable tool rig until daily rate of production is established and complete. The subject of the section, containing 50. acres, is dedicated to the well site.

**I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.**
