This well developed a casing leak. Drilling mud was found in the production unit. We pulled 1 1/4" tubing and located hole in the casing with a plug and a retrievable packer. The hole was located and we squeeze the well with 175 sacks of cement and reran tubing with a bit and cleaned out to bottom, and pressured to 1800# Held OK. We reran tubing and put well back on the line.

I, I hereby certify that the information above is true and complete to the best of my knowledge and belief.
