14. API NO.

15. ELEVATIONS (SHOW DF, KDB, AND WD)
6079' GL

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

It is intended to permanently repair the casing failure by pulling the tubing and packer, setting a bridge plug above the perforations, isolating the failure, and squeeze cementing the leak with a sufficient amount of cement to repair the failure. After the cement is cleaned out, the casing will be tested to 1000 psi, and the production tubing reran.

Subsurface Safety Valve: Make and Type _____ Set @ _____ Ft.

18. I hereby certify that the foregoing is true and correct
