13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Plan to plug well as follows:

1. Place 1st plug from 911' back to 700'.
2. Perforate & cement inside and outside casing from 100' to surface.
3. Clean up, level pit & location.
4. Reseed with specified seed around suggested date.

I suggest that the P & A marker be waved on this well in favor of a flat plate welded on the casing approximately four feet below ground level. After the well is P & A'd a standard marker would be very close to the middle of the existing road and perhaps dangerous to traffic, especially at night.

14. I hereby certify that the foregoing is true and correct.
