The 5 1/2" casing in this well is perforated with 4 radial jets at 1743' and with 20 jets 1726' - 1736'. Well was converted from producing to water injection on 9/11/71 and water injection was shut in on 3/29/73.

Production at conversion to injection was 9 BOPD and 8 BWPD.

We propose to put producing equipment on this well and test to determine if economical oil production is possible.
