July 24, 1962

Navajo Ute  
Well No. A-2 is located 2130 ft. from S line and 1980 ft. from W line of sec. 8

NE/SW 8 31 North - 16 West N.M.P.  
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

Semi-wildcat San Juan New Mexico  
(Field) (County or Subdivision) (State or Territory)

The elevation of the ~~surface~~ ground above sea level is 5670 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

It is the intention to drill through the Dakota formation, but not more than 2000 feet below the surface of the ground. Rotary tools and air will be used. If the Gallup or Dakota are found to be productive, 4-1/2" or 5-1/2" casing will be set, the producing intervals perforated and the well produced through 2" tubing. Estimated total depth will be 2000 feet. 60 feet of 7-5/8" or 8-5/8" casing, cemented to surface; 2000 feet of 4-1/2" or 5-1/2" casing cemented with 20 sacks.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
