This will serve as clarification of the current status of this well for the record.

The well was originally completed 4/19/59 as a producing oil well; on 9/29/60, it was converted to a water injection well. In September 1979, the well was a producing oil well again. There is no data in our files documenting this change in status or indicating when the change occurred.

This form is being filed to confirm the well's current status as a producing oil well.
