Dear Jim:

The New Mexico Oil Conservation Division, as part of its Underground Injection Control authority, requires all operators of Class II injection wells to perform a Mechanical Integrity Test (MIT) once every five years. On December 8, 1993 I witnessed successful MIT's on the above mentioned wells. Hart Oil & Gas is now in compliance with all of the NMOCD's UIC requirements outlined in my letter dated June 21, 1993 for the referenced wells.

If you have any questions feel free to call this office.

Yours Truly,

Dianna K. Fairhurst  
Deputy Oil & Gas Inspector
