The elevation of the derrick floor above sea level is 6369 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Ute Mountain Tribal "D" Well No. 1. On March 18, 1958, 8-5/8" casing was landed at 4210' with 550 sacks 6% cement, and followed by 50 sacks neat cement. After waiting on cement, casing and water shut-off were tested with 1500 pounds pressure for thirty minutes which held with no drop in pressure.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
