The elevation of the derrick floor above sea level is _____ ft.

will be supplied

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This will be a Mesa Verde Test. Hole will be drilled to top of Cliffhouse Sand with rotary tools to an approximate depth of 4200'. 7" casing will be set and cemented. Hole will be deepened through Pt. Lookout with cable tools.

Approximate casing program will be:

100' 40# 13-7/8" seamless casing cemented to surface
4200' 20# 7" seamless casing cemented with 250 sacks

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
