17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

**To restore this well to a producing condition it is intended to workover and re-stimulate in the following manner:**

**Locate and squeeze cement leak in 7" casing. If leak occurs between 1500' and 2680' no block squeeze of the 7" annulus is planned. If leak does not occur in the above interval, perforate 7" casing at approximately 2250' and block squeeze with a minimum of 100 sacks of cement.**

**Set a whipstock at approximately 3490', mill a window in the 7" casing and drill to approximately 5100'.**

**Run a full string of 4 1/2" production casing and selectively perforate and frac the Mesa Verde in two stages.**

**Note: This Sundry Notice supercedes the one dated August 10, 1965 to plug and abandon.**

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
