Mobil Navajo  
Well No. 2 is located 1900 ft. from [N] line and 850 ft. from [W] line of sec. 7  
SW/4 NW/4 Sec. 7 31N 16W NTPM  
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)  
Undesignated San Juan New Mexico  
(Field) (County or Subdivision) (State or Territory)

The elevation of the ground derrick floor above sea level is 5375 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill this well to test producing possibilities of the Gallup sands (or Basal Niobrara). Estimated T.D. is 1550'.

100' of 8 5/8" O.D. 24# casing will be set and cemented to surface. 4 1/2" O.D. 9.5# J-55 casing will be run to T.D. and cemented to about 800' if commercial production is found.

This acreage was obtained from Mobil Oil Company by Designation of Operator dated October 15, 1962.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

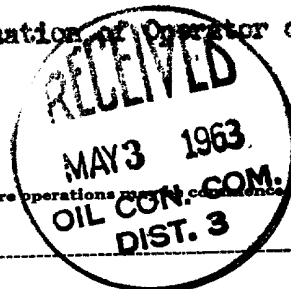

Company The Atlantic Refining Co.

Address Box 2197

Farmington, N.M.

B. J. Sartain  
Title Drilling & Production Supervisor

1. The first part of the report is a general introduction to the subject of the study. It discusses the importance of the study and the objectives of the research. It also provides a brief overview of the methodology used in the study.

2. The second part of the report is a detailed description of the study area. It includes information about the location of the study area, the population of the study area, and the characteristics of the study area. It also discusses the data sources used in the study.

3. The third part of the report is a detailed description of the study results. It includes information about the findings of the study, the conclusions drawn from the findings, and the implications of the findings. It also discusses the limitations of the study and the need for further research.

4. The fourth part of the report is a conclusion and recommendations section. It summarizes the main findings of the study and provides recommendations for future research and policy. It also discusses the significance of the study and the contribution it has made to the field.

The study has shown that there is a significant relationship between the variables studied. The findings suggest that the study area is characterized by a high level of diversity and a high level of complexity. The study also found that the study area is a highly dynamic and changing environment. The study has provided valuable information about the study area and its characteristics. The study has also provided valuable information about the methodology used in the study. The study has provided valuable information about the findings of the study and the conclusions drawn from the findings. The study has provided valuable information about the implications of the findings and the need for further research.

The study has provided valuable information about the study area and its characteristics. The study has provided valuable information about the methodology used in the study. The study has provided valuable information about the findings of the study and the conclusions drawn from the findings. The study has provided valuable information about the implications of the findings and the need for further research. The study has provided valuable information about the significance of the study and the contribution it has made to the field.
