(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

RECEIVED
JUN 28 1963
U. S. GEOLOGICAL SURVEY
FARMINGTON, NEW MEXICO

Well No. 27 is located 2500 ft. from [N] line and 500 ft. from [E] line of sec. 22
22 (4 Sec. and Sec. No.) 22E (Twp.) 27W (Range) 109W (Meridian)
San Juan (County or Subdivision) New Mexico (State or Territory)

The elevation of the derrick floor above sea level is 5143 ft. Reported

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Rotary drilling equipment will be used to drill to approximately 2200', a 5" casing will be run and cemented to surface. If production is encountered the required amount of 4" casing will be run and cemented with sufficient cement to cover the highest potentially productive zone. Water and mud will be used for circulation. All zones will be tested and logs will be run prior to setting casing or abandonment. Stimulation treatments may be used in completion.
This is not a true location due to terrain.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
