NAVAJO TRIBE OF INDIANS

Well No. 7 is located 720 ft. from N line and 720 ft. from E line of sec. 12NE NE Section 12
(1/4 Sec. and Sec. No.)31N
(Twp.)17W
(Range)NMP
(Meridian)Unmanned
(Field)San Juan
(County or Subdivision)New Mexico
(State or Territory)The elevation of the derrick floor above sea level is _____ ft. 5,133 Ungraded

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding, cementing points, and all other important proposed work)

Rotary drilling equipment will be used to drill to approximately 1,100', a
 Rammer test. Approximately 30' of 7" surface casing will be run and cemented
 to surface. If production is encountered the required amount of 4 1/2" casing will
 be run and cemented with sufficient cement to cover the highest potentially
 productive zone. Mud with properties to maintain good hole condition will be
 used. All shoes will be tested and electric logs will be run prior to setting
 casing or abandonment. Stimulation treatments may be used in completion.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
