OUT OR GAS SANDS OR ZONES

(2) 300 mg/kg/day

ELIAS JETAW MATHEOTIS

COVERING PAGES 10-15

It is of the greatest importance to have a complete history of the well. Please state in detail the dates of redrilling, together with the reasons for the work and its results. If there were any changes made in the casing, state fully, and if any casing was "sidetracked" or left in the well, give its size and location. If the well has been dynamited, give date, size, position, and number of shots. If plugs or bridges were put in to test for water, state kind of material used, position, and results of pumping or bailing.

## This is a scan of a blank ledger page. The page features a header section at the top with several columns of varying widths. Below the header is a large body area divided by vertical lines into multiple columns. Horizontal lines create rows throughout the page. The paper appears aged and slightly discolored. There are some faint marks and shadows across the surface, possibly from the scanning process or the original document's texture. A small, dark mark is visible near the bottom right corner.
