The elevation of the derrick floor above sea level is **5280** ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Casing - 8-5/8" at 32' - not cemented  
4-1/2" at 1170' - 180 san cement - circulated

Perforated 4-1/2" casing with 40 jet shots from 1101' to 1111'.  
Sand-oil fraced with 14,300 gallons oil, 18,000 lbs. sand.  
After recovery of lead oil well pumped 38.5 BOPD with no water. Well does not produce water now. Well was drilled with rotary tools using air to circulate and no water was encountered while drilling.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
