SUBSEQUENT REPORT OF:

REMEDIAL WORK ☐
COMMENCE DRILLING OPNS. ☐
CASING TEST AND CEMENT JOB ☐
OTHER ☐

ALTERING CASING ☐
PLUG AND ABANDONMENT ☐

17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

To increase production it is intended to workover and recompleate this well in the following manner:

Squeeze cement the 7" annulus at top of Kirtland (approximately 2070').

Clean out the old hole or whipstock and redrill through the Mesa Verde formation to approximately 5400'.

Run full string of 4 1/2" production casing with sufficient cement to tie into the 7" casing.

Perforate and sand-water frac the Mesa Verde formation.

In the event it is necessary to whipstock, squeeze cement the open hole through a sandstone set near the bottom of the 7" casing with approximately 250 sacks of cement.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
