Navajo Tribe of Indians #0
Well No. 26 is located 1000 ft. from N line and 2000 ft. from W line of sec. 1
SE NW Section 1 31N 17W R4E
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Navajo Gallup San Juan New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 5310 ft. G. L. Sargent

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

Rotary drilling equipment will be used to drill to approximately 1300', a formation test. One joint of either 7" or 8-5/8" surface casing will be run and cemented to surface. If production is encountered the required amount of 8-5/8" casing will be run and cemented with sufficient cement to cover the highest potentially productive zone. Air, oil or mud may be used for circulation. It is planned to eventually use this well as a water flood injection well; however, it will be fractured and possibly sand tested.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company Mobile Oil & Refining Company

Address P. O. Box 3000

Durango, Colorado
