Mr. Harry J. Valentine  
Attorney at Law  
321 Goodrich Building  
Phoenix, Arizona

Dear Sir:

In reply to your letter of March 15, 1954 concerning information on the Valentine well in the NE/4 Section 32-32N-10W is the following:

Total Depth, 5289'; Completion date, 10-20-54; Initial Production 4,760 MCF per day.

We have received no Notice that the well has yet been put on the line; therefore we assume that the well is not producing.

The well is capable of producing <sup>marketable</sup> gas and your land is included in a producing communitized unit. The owner of the remaining land in the 320-acre unit is the State of New Mexico. The land is leased as follows: Standard of Texas - SW/4 NW/4; Stanolind, NE/2 and the SE/4 NW/4 and the 1/2 NE/4.

In regard to Unitisation of lands in wells, I am enclosing a copy of our Rules and Regulations and refer you to Section 13, Paragraph 3 of the Statutes to be found on Page 87.

I hope that I have satisfactorily answered all your questions. If not, please do not hesitate to write again.

Yours very truly,

John J. Abendschan
