April 15

DIST. 3

Well No. 3 is located 990 ft. from SW line and 990 ft. from W line of sec. 29  
SW SW Section 29 32N 10W N. M. P. M.  
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)  
Blanco - La Plata San Juan New Mexico  
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 6021 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate muddling jobs, cementing points, and all other important proposed work)

It is intended to change plans of drilling this well in the following manner:

1. To drill to a depth of 2900' and set 7" casing.
2. To drill from 2900' to 4535' and set a 5 1/2" liner on bottom.

This is to be done to facilitate the drilling to avoid blowout from the Fruitland and loss circulation in the Lewis.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company EL PASO NATURAL GAS COMPANY
