(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 6350 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This well was drilled with rotary tools to a total depth of 5025', and 7" casing set. It was then gas drilled to 5094' where a whipstock was set. A directional hole was drilled through the Cliff House, Total Depth 5195' with maximum drift angle of 13°, and the formation treated. The directional hole was continued through the Point Lookout formation to a total depth of 5650' with maximum drift angle of 26° and the formation treated. The position of the bottom of the hole at total depth was 225' from vertical S 32° E.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company El Paso Natural Gas CompanyAddress Box 997Farmington, New MexicoBy E. S. OberlyTitle Petroleum Engineer

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that proper record-keeping is essential for ensuring the integrity of the financial data and for facilitating the audit process. The document also highlights the need for transparency and accountability in all financial dealings.

In the second part, the document outlines the specific procedures for recording transactions. It details the steps involved in the accounting cycle, from identifying the transaction to posting it to the appropriate ledger account. The document also provides examples of how to record various types of transactions, such as sales, purchases, and transfers.

The third part of the document focuses on the reconciliation of accounts. It explains the importance of reconciling the company's books with the bank statements and other external records. The document provides a step-by-step guide to performing a reconciliation and discusses the common reasons for discrepancies.

The final part of the document discusses the preparation of financial statements. It outlines the requirements for preparing the balance sheet, income statement, and statement of cash flows. The document also provides guidance on how to present the financial statements in a clear and concise manner.
