The elevation of the derrick floor above sea level is 6329 ft. G.L.

DETAILS OF WORK

U. S. GEOLOGICAL SURVEY
FARMINGTON, NEW MEXICO

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Original intention called for 7800' of 4 $\frac{1}{2}$ " casing cemented w/150 sks-40% Diacel "D" followed by 75 sks 2% gel. cement.

We propose to alter this program as follows:

Run 5 $\frac{1}{2}$ " 15.5# J-55 casing to approx. 7750' and set 2-stage collar at approx. 5500', cement 1st. stage w/approx. 100 sks cement and 2nd stage w/approx. 100 sks cement.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations are commenced.
