Re: Colorado Oil & Gas #1 D. Riddle
SE 20-32N-11W

Gentlemen:

The above well was connected to El Paso Natural Gas Company's gathering line 11/3/54 and therefore a 1954 Deliverability Test was not required. It will be necessary, therefore, to grant this well an allowable based upon 15% of the open flow until such time as a Deliverability Test is run next spring. We find that we have no Form C-122-B, which is the Initial Potential test form in our file.

We are enclosing a supply of Form C-122-B. Please file an original and two copies with this office so that we may place your well on the first proration schedule.

Yours very truly

Emery C. Arnold
Oil & Gas Inspector
District #3
