NEW MEXICO OIL CONSERVATION COMMISSION  
INITIAL POTENTIAL TEST-DATA SHEET

FORM C-122-B

This form must be used for reporting all pitot tube tests made in the State. It is particularly important that it be used for reporting Initial Potential Tests in the San Juan Basin as prescribed by Order No. R-333 and by the New Mexico Oil Conservation Commission Manual of Tables and Procedure for Initial Potential (Pitot Tube) Tests.

**Figure 1.** The effect of the number of iterations ( $n$ ) on the accuracy of the proposed algorithm. The figure shows two plots. The left plot shows the accuracy of the proposed algorithm (Y-axis) versus the number of iterations ( $n$ ) (X-axis). The right plot shows the accuracy of the proposed algorithm (Y-axis) versus the number of iterations ( $n$ ) (X-axis).
