U. S. GEOLOGICAL SURVEY
FARMINGTON NEW MEXICO

July 17, 1959

Well No. 70 (MD) is located 1563 ft. from N line and 340 ft. from E line of sec. 21

NE 1/4 of Sec. 21 (1/4 Sec. and Sec. No.) 32N 9W N.M.P.M. (Twp.) (Range) (Meridian)
Blanco-Mesa Verde & Wildcat-Iskota (Field) San Juan New Mexico (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 6909 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is intended to plug and abandon this well because of fish at the bottom of the hole. Fish consists of 28 joints 3 1/2" IF drill pipe attached to Baker Model K retainer which was set at 3867'. Top of fish is at 3071'.

Free point will be determined for 9 5/8" casing, and casing will be cut off above free point.

Cement plugs will be spotted as follows.

- 50 sacks on top of fish.
- 50 sacks at cut off point for 9 5/8" casing.
- 50 sacks at surface.

Permanent marker (4" pipe-4 ft. long) will be installed when drilling rig leaves the location.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
