Re: Status of San Juan 32-8 Unit NP #4  
K - Sec. 15, T-32-N, R-8-W

This refers to your letter dated June 28, 1967, regarding the status of the San Juan 32-8 Unit NP No. 4, located K-15-32-N, R-8-W.

This well was completed in December, 1953 with an open flow potential of 560 MCF/D. The well has never been tied in because the producing potential does not justify the expenditure necessary for the installation of a line.

It is expected that it will remain a shut in gas well for some time.

Yours very truly,

F. H. Wood,  
Regional Petroleum Engr.
