13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

This well is an open hole, nitroglycerine completion. In 1994, a sundry was filed and approved to sidetrack, redrill, case, and fracture complete the Mesaverde formation. This work was not done at that time and the sundry was cancelled in 1995. The proposed sidetrack of this wellbore has been reinstated in our 1997 work program and that procedure will be filed again next year.

Until then it is proposed to renew the temporary abandonment status of the well bore. As requested, a casing integrity test will be performed on the well.
