Dear Mr. Hatch:

Please enter one or more cases on the docket for the hearing on August 18, 1971, to allow the El Paso Natural Gas Company to appear and show why each of the referenced wells should not be recompleted as single zone completions or the wells be properly plugged and abandoned.

The attached copies of letters indicate that the wells are not being operated as required by the orders authorizing the dual completions.

Our records do not reflect that any remedial action has been taken on any of the wells or that other tests have been taken subsequent to their receiving notice to repair.

If other information is needed, please contact us.

Yours very truly,

A. R. Kendrick

Allison Unit No. 13 (MD)
M-12, 32-N, R-7-W

Dear Mr. Kendrick:

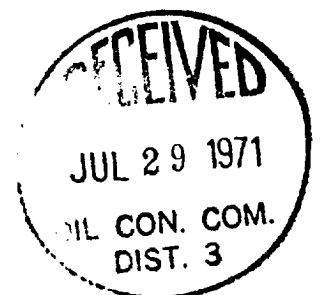

Mr. George Hatch of the Oil Conservation Commission was requested by letter, dated July 2, 1971, from you, to enter a case on the docket for the August 18, 1971, hearing to determine why the zones of the referenced dually completed well should not be separated or the well be properly plugged and abandoned.

Mechanical repair to provide separation of the zones was completed on July 23, 1971. The well is currently in the process of having a Packer Leakage test conducted on it. It is therefore requested that a case for this well not be entered in the above hearing.

Yours very truly,

W. D. Dawson,
Petroleum Engineer

Dear Mr. Hatch:

I requested by letter of July 2, 1971, that one or more cases be docketed for August 18, 1971, to allow the El Paso Natural Gas Company to appear and show why each of the captioned wells should not be repaired or plugged.

The attached copies of letters indicate that the repair has been accomplished on three of the wells and the other will be repaired in the immediate future.

Therefore, the docketing of a case will not be required.

If further information is needed please contact us.

Yours very truly,

A.R. Kendrick
