Re: Allison Unit No. 27 (MD), A 30-32-6.

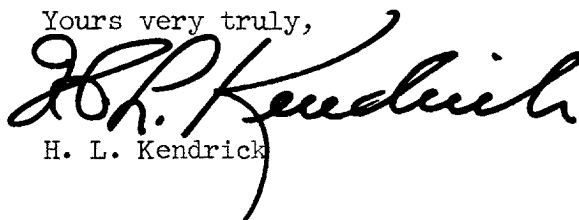

Dear Mr. Arnold:

The above captioned well was completed on October 13, 1965. The Mesa Verde zone was first delivered on November 8, 1965 and the Dakota zone was first delivered December 30, 1965. An initial production test was filed on each producing zone. During 1966, the well was worked over. The Mesa Verde zone was redelivered to the pipeline on December 12, 1966 and the Dakota on December 15, 1966. Initial production tests are currently being conducted and calculated for submission to your office.

By reason of these producing zones being worked over and redelivered to the sales line after October 31, 1966, we respectfully request that the shut-in notice be withdrawn from these producing zones.

If there are any questions about this matter, please call us.

Yours very truly,

H. L. Kendrick
