San Juan County, New Mexico

Dear Sir:

The above well has been shut-in six months overproduced. As per your request, we have measured shut-in pressures on the well to check for cross-flow between zones. In six days tubing and casing pressures had stabilized at 340 psi and 445 psi, respectively. The well was monitored for two more days with no change.

Please call if you have any questions.

Sincerely,

TENNECO OIL COMPANY
