If well is directionally drilled, give subsurface locations and measured and (rue vertical depths for all markers and sones pertinent to this work.) * ARCO Oil and Gas Company respectfully requests approval for extension of long term shut-in status on this well. Over the past two years, ARCO has reactivated several previously uneconomic long term shut-in wells and found commercial production. In addition, an ongoing CO2 feasibility study is underway which may yield significant additional oil recovery. Implementation of a CO2 flood would require the workover of existing wells, and the drilling of new wells. For these reasons, ARCO proposes that this well be maintained in the long term shut-in status so that the wellbore will be available, should future production tests indicate commercial production or should it be needed as part of a future CO2 flood. This plan eliminates the economic waste of potentially usable wellbores and promotes conservation. ECEIAE DEC 0 4 1989 APPROVED FOR A PERIOD OU CON. DIV. NOT TO EXCEED 1 YEAR. oist. 3 18. I hereby certify that the foregoing is true and correct
