ARCO Oil and Gas Company, Inc. requests approval for extension of long term shut-in status of this well. ARCO continues to find ways to reactivate previously uneconomic long term shut-in wells and has returned several to production as market conditions and production allowed. As you are aware, ARCO is drilling its working interest in the Horseshoe Gallup Unit and the well and are very interested in reactivating long term shut-in wells especially with the recent increase in oil prices. For these reasons, ARCO proposes that this well be maintained in the long term shut-in status so that the wellbore will be available, until future production tests indicate commercial production. This will allow for potential waste of potentially usable wellbores and avoid the need for additional drilling.
