If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

We propose to cease continuous operation of this well as presently uneconomical to operate. Well is producing 1 BOPD & 0 SWPD. We do expect to periodically test the well to detect any significant increase in its oil producing capability. If this change occurs, the well will be returned to producing status. We propose to start shut in on January 1, 1968.
