17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

This well is notched at 1045' and perforated 1046' - 1050' w/8 jets. Its production is uneconomical at 1 B.O.P.D. Based on the wells sand development; and production from offset wells, we propose to add perforations from 1034' to 1040' and sand oil fracture the well using about 30,000 # sand and 30,000 gallons lease crude, and resume producing the well.
