

MESA PETROLEUM CO.
Hamilton Federal #502
Sec. 30, T32N, R10W
1650' FN & WL of Section 30
San Juan Co., New Mexico

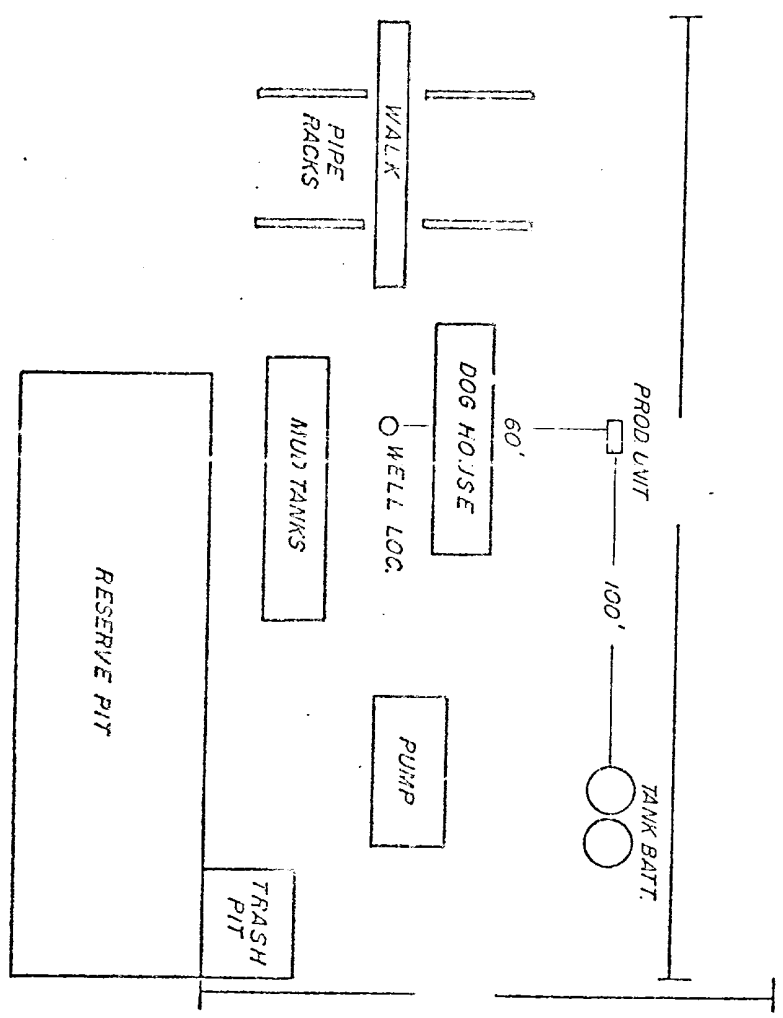

DEVELOPMENT PLAN FOR SURFACE USE

1. See Exhibit A for existing roads.
2. The access road to the location is south of an existing east-west road and will be about 700' as indicated on Exhibit A.
3. Exhibit A shows wells existing within a one-mile radius.
4. See Exhibit A.
5. Production facilities at the location will consist of a well effluent production unit located 60 feet north of the well and liquid storage tanks located approximately 100 feet east of the production unit, tanks will run east to west. See Exhibit B for details.
6. Water supply for drilling operations will be procured at either an irrigation ditch near Cedar Hill, N. M. or the Animas River crossing at Cedar Hill, N. M. Point of water supply is indicated on Exhibit A.
7. Waste drilling fluids and cuttings will be contained in earthen pits to be backfilled after sufficient drying. Trash and garbage will be contained in a separate earthen pit and back filled.
8. No camp is planned.
9. No airstrip is planned.
10. See Exhibit B.
11. Due to terrain at this location, a wind row of topsoil will not be required. Trees that are removed will be covered in the pit during clean-up operations.
12. The general area is typical hill country with native grasses and evergreen trees.

The company representative responsible for compliance of the Development Plan Use is James Archer. He may be contacted at one of the following phone numbers:

- A. Office: (505) 334-6157, Aztec, N. M.
