☐ Final Abandonment Notice

☐ Abandonment

☐ Recompletion

☐ Plugging Back

☐ Casing Repair

☐ Altering Casing

☒ Other add Lewis Shale

☐ Change of Plans

☐ New Construction

☐ Non-Routine Fracturing

☐ Water Shut-Off

☐ Conversion to Injection

☐ Dispose Water

(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

13. Describe Proposed or Compelled Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

We plan on adding the Lewis Shale completion to the existing Mesa Verde. 7", 23#, SH casing @ 3460' with a 4 1/2", 10.5#, CW-55 casing from 3359' to TD of 5588'. PBSD is 5588'. Will complete the Lewis Shale with a 3 1/2" Frac String and 7" packer set @ +/-3325'.

Lewis Shale Completion will be a 2 stage Foam Frac as Follows:

Lower Lewis Shale 4025' - 4300', perforate 50 - .38" holes, and use 100,000# 20/40 Brady Sand.

Upper Lewis Shale 3730' - 3955', perforate 50 - .38" holes, and use 100,000# 20/40 Brady Sand.

To complete this formation we will need to construct an earthen blow pit (30' x 50' x 10' deep). All work will be within existing disturbed location. We will close pit when all water has been removed and re-seed to BLM specs.

We plan on completing this formation upon BLM approval and rig availability.

I hereby certify that the foregoing is true and correct

Signed
