17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Due to lack of gas market (GCNM) this well is currently uneconomic to produce. The engine must be replaced and the rods are stuck in paraffin. We will do the necessary remedial work when the price of oil justifies the expenditure. Anticipated production is 3 BOPD, therefore, we would prefer to wait until we are able to augment the income with gas sales rather than vent the gas. If the gas market does not improve within 6 months we will canvas our partners to obtain approval to do the remedial work necessary (assuming oil prices improve or remain stable). This application is being submitted on the advice of Sheri Fricke with the Denver BLM office.
