17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

The above captioned well has been drilled to a depth of 2571' and 4 1/2" casing set & cemented through the prospective Dakota horizon. The upper Dakota sand zone has been perforated & tested; however, no commercial production of gas or oil has been indicated at this time. (See "Well History" and "Completion Report".)

Since the above operation has been performed, the Robert C. Anderson Ute Mtn. Ute No. 4 & No. 5 have recently been drilled in Sec. 14 - Twp. 31N-16W and 4 1/2" casing set in the upper Dakota section of these wells. Around February 15, 1978 it is planned to move in a completion rig and commence completion of these wells and while the completion rig is here it is planned to move it on the above captioned well (Ute Mtn.-AGA No. 1) and further test it for commercial use and/or promptly abandon it according to regulations. It is therefore requested that the above well be granted temporary abandonment or suspension of operations for a period of 90 days.

18. I hereby certify that the foregoing is true and correct

Instructions

General: This form is designed for submitting proposals to perform certain well operations, and reports of such operations when completed, as indicated on Federal and Indian lands pursuant to applicable Federal law and regulations, and, if approved or accepted by any State, on all lands in such State, pursuant to applicable State law and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local, area, or regional procedures and practices, either are shown below or will be issued by, or may be obtained from, the local Federal and/or State office.

Item 4: If there are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. Consult local State or Federal office for specific instructions.

Item 17: Proposals to abandon a well and subsequent reports of abandonment should include such special information as is required by local Federal and/or State offices. In addition, such proposals and reports should include reasons for the abandonment; data on any former or present productive zones, or other zones with present significant fluid contents not sealed off by cement or otherwise; depths (top and bottom) and method of placement of cement plugs; mud or other material placed below, between and above plugs; amount, size, method of parting of any casing, liner or tubing pulled and the depth to top of any left in the hole; method of closing top of well; and date well site conditioned for final inspection looking to approval of the abandonment.
