RE: **Lea #1M, C-30-31N-12W**

Dear Kay:

The 1990 Packer Leakage Test on the referenced well was incomplete and inconclusive.

Please reschedule and retest the well in such a manner as to prove zone separation. Shut both zones in for a minimum of three days. Flow the higher pressured zone to the atmosphere as long as it takes to reduce the pressure to less than the lower pressured zone.

Please notify this office at least 24 hours prior to the test so we may provide a witness.

Yours truly,

A handwritten signature in cursive script, reading "Charles Gholson".

Charles Gholson
Deputy Oil & Gas Inspector
NMOCD District III
