Re: Susco 16 #1 M-16-32N-8W

Dear Cecil;

Annual packer test on the referenced well was inconclusive in proving zone separation.

Please reschedule and retest the well in such a manner as to prove zone separation. Shut both zones in for a minimum of 3 days. Blow the higher pressured zone to the atmosphere for as long as it takes to get a significant pressure drop. Please advise this office at least 24 hours prior to the test, so we may provide a witness.

Yours truly,

A handwritten signature in cursive script, appearing to read "Charles Gholson".

Charles Gholson
Deputy Oil & Gas Inspector
