*Administrative Order NSL-1466-A*

Dear Mr. Black:

Reference is made to your application dated May 6, 1993 for a non-standard Mesaverde gas well location for your existing Childers Well No. ~~21~~ which was drilled in 1982 and completed in the Basin Dakota Pool at a previously approved unorthodox gas well location 1060 feet from the South line and 1275 feet from the East line (Unit M) of Section 3, Township 31 North Range 11 West, NMPM, San Juan County, New Mexico (Division Administrative Order NSL-1466).

It is my understanding that the Dakota zone will be properly plugged back and said well will be recompleted to the Blanco Mesaverde Pool, which pursuant to Rule 2(b) of the Special Rules and Regulations for the Blanco Mesaverde Pool, as promulgated by Division Order No. R-8170, as amended, is also unorthodox. Further, the S/2 of said Section 3 shall be dedicated to the well forming a standard 320-acre gas spacing and proration unit for said pool.

By the authority granted me under the provisions of Rule 2(c) of said Special Rules, the above-described unorthodox gas well location is hereby approved.

Further, Division Administrative Order NSL-1466 shall be placed in abeyance until further notice.

Sincerely,

William J. LeMay  
Director

Application for Unorthodox Location  
Childers #3 Well  
SW/4 Section 3, T31N-R11W  
Blanco Mesaverde Pool  
San Juan County, New Mexico

Amoco Production Company hereby requests administrative approval for an unorthodox location in the Blanco Mesaverde Pool. Amoco plans to recomplete the existing Dakota producer, Childers #3 Well, to the Blanco Mesaverde and abandon the Dakota perfs in the well. The original Mesaverde well in this quarter section (Mudge A 5) was plugged and abandoned in November, 1991.

The Childers #3 Well was drilled in 1982 at an approved unorthodox location 1060' FSL and 1275' FWL of Section 3, T31N-R11W as a Dakota producer. Administrative Order NSL-1466 approved the location due to topographic conditions in this area. Since the well does not conform to the Blanco Mesaverde location requirements, an approval of unorthodox location is required.

Amoco is the only operator offsetting the subject spacing unit and no additional notice is required.

Sincerely,

J. W. Hawkins
