17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

This location was originally permitted to drill and approved on March 8, 1985 as the McDermitt #1E a single Dakota well, Due to a change in plans, it is intended to drill this well as a Mesa Verde-Dakota dual as follows;

Drill 12 1/4" hole, set 300' 9 5/8" 36# casing, cemented with 189 ft³ to circ surface.
Drill 8 3/4" hole, set 4150' 7" 23# casing, cemented with 1250 ft³ to circ surface.
Drill 6 1/4" hole, set 4 1/2" 11.6# liner from 4000' to 7095' cemented with 540 ft³ to liner.

The MV & DK will be selectively perforated and sand water fractured and both formations will be isolated with a production packer.

Attached is a well location plat showing the name change and the new dedicated acreage for a dual well,
