17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent details including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

**Request permission to use electronic flow meter (EFM) by Total Flow. Model number is #6610. Serial number is #19065. Meter run I.D. is 2.065". Orifice size is 1.000". Differential range is 0-100". Static range is 0-1000". Temperature range is 0-150 degrees F. Can retain data for 35 days. Solar charged battery provides power. Maintained by Western Gas Processors, Ltd. Station number is #91901127. Meter installed at Ruin Corner in SWSWSE 28-31n-14w.**

**Request permission to combine production for off-lease/pad gas measurement and sales based on economic necessity. Pipeline companies will not lay line to wells. BASF must lay line to Western line. All gas passes through 3 meters: BASF allocation meter at each wellsite, BASF check meter, and Western Gas Processors' sales meter. Check meter immediately upstream from sales meter. Sales amount recorded by Western is allocated to each well based on proportion produced by each well as recorded by allocation meters. Check meter verifies sales meter. All working and royalty interests notified. Same royalty rates for all leases. All leases Indian. See attached map for well locations, lease line, pipeline route, and Western Gas Processors sales meter location.**
