13. Describe Proposed or Completed Operations

It is intended to workover the subject well in the following manner:

Move in rig up. Pull the tubing. Pull the 5-1/2" liner. Caviatate the Fruitland Coal formation utilizing natural and air assisted surges until the well stabilizes. Clean the well to TD and run a 5-1/2", 15.5#, K-55 casing liner. The liner will be pre-perforated 4 SPF across the coal intervals. Re-run the production tubing. The well will then be returned to production.
