13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

We tested casing for a potential leak and found casing to be in good shape. Tested at 1000 psi from 4733' KB to surface with no leaks in casing. Bottom of casing set at 5092' KB with OH from 5092'-6100' KB.

Since we did not find a casing leak we did not need to dig a pit to contain cement returns. Tests were completed on 9-26-94. The trace of what we thought was mud and/or cement was actually formation mud.

14. I hereby certify that the foregoing is true and correct
