☐ Casing Repair
☐ Altering Casing
☒ Other Clean out fill
☐ Change of Plans
☐ New Construction
☐ Non-Routine Fracturing
☐ Water Shut-Off
☐ Conversion to Injection
☐ Dispose Water

(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Production on this well has dropped off significantly due to coal fines filling the well bore.

We plan on cleaning out the well bore with an air package to TD of 3610' KB OH- 3223' KB thru 3610' KB. KB=15'0". To clean out with air we will need to construct a water pit 30' X 50' X 10' deep and a blow pit 20' X 30' X 4' deep. The blow pit will drain into the lined (12 mil plasitc) water pit. Pit will be fenced until pit is closed. After clean out is complete and all fluid is removed, we will cover all coal fines within the plastic by folding the plastic over the top and bury, reclaiming soil over pit and reseeding to BLM specs. All proposed work will be on existing disturbed well pad.

Proposed work planned to begin as soon as rig is completed cleaning out the Gardner 3-C (10-14 days) and assuming we have pipeline capactiy to handle additional gas. Estimated start date June 5-7, 1994 or as soon as Sundry Notice is approved.

14. I hereby certify that the foregoing is true and correct

Signed

Donald L. Johnson
