It is proposed to swab test the Lower Gallup and perforate and test the Upper Gallup as follows:

- (3) Perforate the Upper Gallup from 1437' - 1457'.
- (4) If necessary breakdown the perforations with acid and/or frac the interval 1437'-57' to determine its potential.
- (5) Swab test the Upper Gallup. If swab tests indicate it is economical to produce, the Upper Gallup will be put production.
- (6) If the Lower and the Upper Gallup do not have economic potential, the well will be plugged and abandoned as outlined in the Sundry Notice approved on October 13, 1995.

The proposed test will begin within 30 days after receipt of an approved sundry notice.
